

Pianoro, 28 June 2012

**ANNOUNCEMENT 26/E/2012**

**SUBJECT: New certifications for Sayerlack fire retardant coatings**

Sayerlack waterborne fire retardant coatings passed the tests required by the European Directives on Marine Equipment (MED 96/98 EC and 2010/68/EU), and were awarded the famous "**wheelmark**", the Mark of Conformity that allows their sale in the European Union countries and the United States.

According to the standards required by shipyards, fire retardant coatings shall be used in most of the interior of a ship, in compliance with the Maritime Safety provisions.

These certified products can be applied **not only on wood**, but also on substrates such as: **zinc-coated iron, aluminum, plaster, plastic**.

This means that Sayerlack fire retardant coatings can be used for the protection of **all coatable surfaces in the interior of a ship** and also for their maintenance because, being waterborne products, their storage in the ship is allowed.

Moreover, it is sufficient to apply just one coat of product directly on the substrate, without a primer.

Sayerlack obtained the certificates of conformity for the transparent and pigmented **waterborne fire retardant systems TD, TE and TE-X**. These systems already have a Class 1 fire reaction rating, pursuant to the Italian regulation UNI 9796.

The certified systems are made up of the following products:

**TD AF0022/13 system:** white one-pack waterborne self-priming topcoat, pigmentable with XA2006/XX waterborne pastes. In order to obtain the certificates of conformity one coat is sufficient, for a total weight of 210 g/m<sup>2</sup>.

**TE AF1105/00 system:** transparent two-pack waterborne self-priming topcoat. In order to obtain the certificates of conformity one coat is sufficient, for a total weight of 200 g/m<sup>2</sup>.

**TE-X AF1105/XX system:** two-pack waterborne self-priming topcoat pigmented with XA2006/XX waterborne pastes. In order to obtain the certificates of conformity one coat is sufficient, for a total weight of 150 g/m<sup>2</sup>.

Technical data sheets are attached.

For further information, please refer to your Area Manager.

Yours Sincerely,

SAYERLACK S.r.l.
